Professional Summary

Backend Developer specializing in Python and Django, skilled in building scalable web applications, secure REST APIs, and optimized databases. Committed to clean, efficient code and solving complex challenges.

Skills

Languages: Python, Java, C, C++

Web: HTML, CSS, JavaScript

Frameworks: Django, Bootstrap

Databases: SQLite, PostgreSQL

Tools: Git, REST APIs, VS Code

Other: Responsive Design, DB Optimization, Authentication Systems

Education

Nepal Banepa Polytechnic Institute

Diploma in Information Technology, Percentage: 69%

Dhulikhel, Nepal

2018–2021

Projects

News Portal Website:

- Developed a dynamic news portal enabling article publishing, category filtering, and search functionality.
- Built with Django, HTML, CSS, JavaScript, and integrated SQLite for database management.
- Enhanced user experience through responsive design and optimized database queries.

E-commerce Website:

- Designed and developed a scalable e-commerce platform using Django and PostgreSQL.
- Implemented product catalog, shopping cart, checkout process, authentication, and payment gateway integration.
- Optimized backend using Django ORM and created REST APIs for potential mobile app integration.

Vehicle Rental System:

- Built a vehicle rental management application with Django and Bootstrap.
- Implemented vehicle booking, user authentication, and payment processing.
- Enhanced performance by optimizing SQL queries and implementing reusable backend logic.

Certifications

Python and Django Course – Sipalaya Infotech Pvt. Ltd. (2024)

Covered Django project development, REST API creation, backend structuring, and deployment basics.
